

OXE Diesel Outboard Network Continues to Grow

Laborde Products has been the southeastern engine distributor for the OXE Diesel outboard motor for the last few years. Recently, Laborde added Sun Power Diesel to their growing OXE dealer network. The family owned and operated, South Florida diesel engine and service provider has an impressive history of nearly seventy years in the marine industry. This new alliance with Sun Power will provide local service and support to OXE customers throughout South Florida with trained technicians and an inventory of parts and engines. Sun Power will handle sales and service throughout South Florida. Finding the best dealers for this one of a kind diesel outboard has only just begun and with the 300 HP OXE on its way, the opportunities are endless for those interested. See the OXE in person at the Fort Lauderdale International Boat Show October 30th through November 3rd, 2019 at booth number 1041.

The Oxe Diesel dealer network continues to grow throughout the US, and if you are interested in becoming a dealer, please reach out to Laborde Products.
